Tutorial 3

September 23, 2020

Introduction

Instructions

We will be having a test quiz to increase your familiarity with Moodle. This is NOT GRADED. You don't need to mail them to sir in case you have not submitted.

1. Go to the "Tutorial 3 Submission" under the **Tutorials** Section on Moodle.
2. A pdf named "Tutorial 3" would be there in the portal.
3. Please download it and solve the questions **1, 2.1 and 2.2** . You **may not** submit Question 0.
4. Upload your scanned answers by **1:25PM**. We would start discussing their solutions by then.

0.1 In the following condition, when is it equal?

$$(A \times B) \cup (C \times D) \subseteq (A \cup C) \times (B \cup D)$$

**0.2** Find the number of primes between 40 - 100 using PRT.

Simplify the following -

1. $(A - (B \cup C)) \cap ((B \cap C) - A)$
2. $(A \cap B') \cup (A' \cap B) \cup (A' \cap B')$

INTERNATIONAL INSTITUTE OF
INFORMATION TECHNOLOGY
H Y D E R A B A D

2.1 A is the set of people who go to resort area for vacation, B is the set of people who take cruise for vacation, C is the set of people who go to national park for vacation. Suppose $|A| = 150, |B| = 100$ and $|C| = 300$

a. How many people only go to a resort area for vacation?
b. How many people only take a cruise for vacation?
c. How many people only go to national park for vacation?
d. How many people either go to a resort area or take a cruise for vacation but not national park?
e. How many people use any of the 3 methods to take a vacation?

2.2 Observe the values of the table and find the number of students who:

	Pudding			
	Chocolate	Tapioca	Neither	Total
Vanilla	68	53	12	133
Strawberry	59	48	9	116
Neither	23	21	7	51
Total	150	122	28	300

Ice Cream

a. Like strawberry ice cream and tapioca pudding

b. Do not like pudding
c. Like at least one of the ice cream flavours
d. Like neither ice cream nor pudding

2.3 Mark the following as true or false:
a. $26 \in \mathbb{Z}$
b. $-5 \in \mathbb{N}$
c. $\sqrt{2} \notin \mathbb{Q} \cap \mathbb{R}$
d. $\mathbb{Z} \cup \mathbb{Q} = \mathbb{R}$
e. $\mathbb{R} \cap \mathbb{C} = \mathbb{R}$
